

Scientific Interest Group (SIG) Meeting

05 March 2024
13:00-14:30 CET

Basel, Switzerland

AI tools for the identification of antibacterial compounds at the hit identification stage

Presented by

Yojana
Gadiya

Data Scientist,
FRAUNHOFER ITMP

This meeting will first provide insights into the machine learning model developed in this SIG. An open manuscript drafting session will then follow and participants will be asked to provide inputs on certain sections of the manuscript, which will focus on use cases identified for the utility of the machine learning model.

- 13:00 Recap presentation on current models
- 13:20 Looking into current paper draft and section assignments
- 13:30 Manuscript section drafting
- 14:15 Reviewing drafted version and next step identification
